

EMBEDDED NETWORKS - TENANTS

With unrivalled experience, Active Utilities delivers residents and tenants of multi occupant locations the future in utilities provision. Enjoy the latest technology, cost savings and world class customer service...at the flick of a switch.

Genuine savings on utilities

Active Utilities combines the buying power of residents and tenants to bulk-purchase utility services. That means you'll make real savings on your utility bills.

There's no need to spend valuable time contacting numerous companies to set up and maintain your services. One call to Active Utilities will have you connected in a flash. We're your single point of contact, from connection to billing and customer support.

Rely on our service

Enjoy fast and trouble-free utility service connections. All systems are remotely monitored by our expert technicians, so you can enjoy complete peace of mind. Our superior customer service even includes 24/7 professional helpdesk support.

Only pay for what you use

We help you determine the services you need and advise on the package best suited to your home or business. You receive the one fully itemised bill which allows you to effectively track your usage.

We can help you access the very latest technology at a fraction of the cost you might otherwise incur. Our future-proof solutions include the best in 'green power' and energy efficient advancements.

Why Active Utilities?

Our service is built on long-standing relationships with Australia's largest ICT, power and utility suppliers. It's this extensive contact network that lets Active Utilities provide you with the most efficient and advanced products available.

Step into the future
